

Single, Twin, Three Core Flat 624_B

A 300/500 Volt domestic and light industrial fixed wiring cable, can be clipped to a surface, embedded in plaster or laid on tray where there is little risk of mechanical impact. Low Smoke Zero Halogen (LSOH) cables are used in installations where smoke and acid gas emission in the event of fire would pose a hazard to the public.

CONSTRUCTION

Single, two or three core flat cables with an additional un-insulated Circuit Protection Conductor (CPC). Solid or stranded plain copper conductor, Cross Linked Polyethylene (XLPE) insulation, cores laid parallel with CPC and LSOH sheath overall white.

TECHNICAL DATA

BS 7211

Nominal Voltage	300/500V
Test Voltage	2000V
Operating Temperature	-15°C to +70°C
Bending Radius	4 x cable O/D single core 6 x cable O/D for flat
Flame Propagation	BS EN 60332-1-2
Smoke Density	BS EN 61034-2
Halogen Emission	BS EN 60754-2
Current Rating Table	4D5A

NOTES: Minimum installation temperature 0°C

When a conductor operates at a temperature above 70°C it should be ascertained that the equipment is suitable.

LSOH 6241_B DIMENSIONS

Cores x mm ²	Nom Dim mm	Weight kg / km
1.0	5.2 x 6.4	40
1.5	5.8 x 7.0	48

A* For full installation method refer to Table 4A2 Installation Method 2 but for flat twin and earth cable
C* For full installation method refer to Table 4A2 Installation Method 20 but for flat twin and earth cable
100# For full installation method refer to Table 4A2 Installation Method 100
101# For full installation method refer to Table 4A2 Installation Method 101
102# For full installation method refer to Table 4A2 Installation Method 102
103# For full installation method refer to Table 4A2 Installation Method 103

Wherever practicable, a cable is to be fixed in a position such that it will not be covered with thermal insulation. Regulation 523.7, BS5803-5: Appendix C: Avoidance of overheating of electric cables Building Regulations Approved document B and Thermal insulation: avoiding risks, BR 262, BRE, 2001 refer.
